"RE: Docket MM 99-325 (IBOC Digitalization)

KWVA is a current applicant for a Low Power FM radio station license. This is the well-loved college radio station of the University of Oregon (go ducks).

We are filing these Reply Comments in support of THE VIRGINIA CENTER FOR THE PUBLIC PRESS. Like them, and others, we are opposed to implementation of In Band On Channel (IBOC) Digitalization. We are concerned that IBOC could displace the frequency for which we have applied, and many other frequencies as well. IBOC could displace both aspiring stations, such as ours, and established stations as well.

We urge the Commission to proceed with the Eureka-147 alternative Digitalization technology, which would avoid the displacement problem. Even then, of course, the Eureka-147 technology should first be tested and evaluated as thoroughly as the IBOC technology has been.

In no event should IBOC Digitalization be adopted without full and complete testing and evaluation of the less disruptive Eureka-147 Digitalization technology.

IBOC stations are unlikely to carry anything but commercial garbage that I have no interest in listening to. If all my stereo radio receivers become obsolete, I vow to sue the FCC and any local IBOC stations for the original price of the equipment as well as the value of all the information & enjoyment I will NOT get out of the commercial pabulum that is already spewed all over the airwaves.

My music speaks of freedom and individuality. I am the public and I own the airwaves. they are nto for sale to the highest bidder, they are the public domain and can not be frittered away for uncultured idiocy aimed solely at marketing junk I will not purchase.

Sincerely,
Brian P. Donnelly
